

CERTIFICATION

NATIONAL SEMICONDUCTOR PRODUCTS FREE OF CERTAIN MATERIALS OF ENVIRONMENTAL CONCERN

This document certifies that National Semiconductor products do not contain and are not manufactured with the following materials of environmental concern:

- Ozone depleting substances
- Mercury or mercury compounds
- Cadmium or cadmium compounds
- Polybrominated biphenyls (PBBs), polybrominated biphenyl oxides (PBBOs), polybrominated biphenyl ethers (PBBEs), and related compounds
- Polychlorinated biphenyls (PCBs)
- Hexavalent chromium
- Asbestos

This is a list of materials of environmental concern for which National Semiconductor is frequently asked to provide certifications. This is not a comprehensive list of hazardous materials, which are not contained in National Semiconductor products or used in National Semiconductor's manufacturing processes. For additional information concerning the content of National Semiconductor products, please contact:
